

# Udo Plaster, MDT Profile/CV

Obtaining his Master's Degree in Dental Technology in 1996, Udo Plaster is continuously on the search for a more holistic and accurate way of applying his expertise and experience with the patient as the focus. As an international lecturer and author of numerous publications, innovator of dental technologies, Plaster shares his knowledge, contributes to the improvement of interdisciplinary communication between the dentist and the dental technician and is committed to the well-being of the patients. Good communication between all 3; the patient, the dentist, the technician are essential elements for obtaining successful results.

“The many “hows” and the “whys” of my work, collecting knowledge not only from books, but mainly from experience in the success of the application are what determine the outcome.”
